

KipTraq (“Keep-Track”) is an app that runs on Android/iPhone/iPad. It provides real-time, accurate data collection with instant email notification of “out of specification” operations. KipTraq will help you manage your processes better, ensure tasks are done on-time, and present clean and accurate data to management, auditors and customers.

### How does it work?

- 1) Your paper/Excel logs are replicated into KipTraq
- 2) Users collect data on their phone or tablet (pass/fail, choose from a list, scan a barcode, take a picture, etc.)
- 3) Data is automatically sent to our secure cloud servers
- 4) Your team runs reports on your data via our website
- 5) Management can quickly adapt KipTraq to reflect changes in your processes

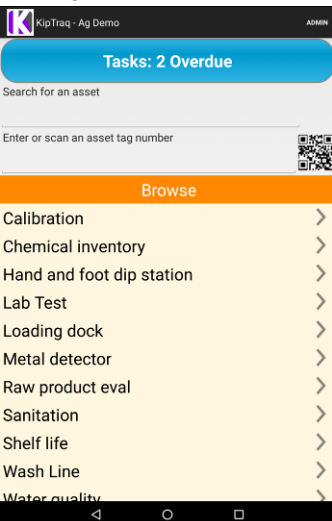

### Features

- Always works, even without internet connection
- Flexible online reporting (including pictures)
- Automatic real-time alerts via email
- Optional RFID tags add speed and security
- Standalone system – no servers to buy or maintain
- Multiple language support
- Inexpensive – monthly fee based on use
- Fast rollout – collect data and report on day 1
- Intuitive – users and admins learn quickly
- Efficient – faster and more useful than paper forms
- Scalable from small companies to multinationals
- Over 1 million transactions logged in KipTraq

### How are KipTraq clients using the solution today?

- **Food processing:** collect process verification data (HACCP/FSMA, sanitation checks, inventories, etc.)
- **Farming:** track plantings, application of fertilizers, water and fuel usage
- **Equipment:** schedule preventative maintenance, log work done to reduce maintenance costs
- **Storage:** manuals and standard operating procedures stored on device and instantly available
- **Field inspections:** use integrated GPS routing to navigate to a location. Perform onsite inspections with pictures

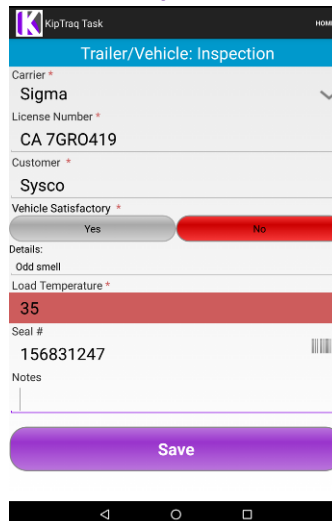

#### Many uses

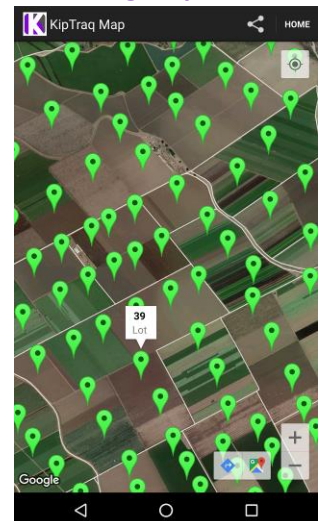

#### RFID asset tag

#### Vehicle inspection

#### Planting map
